Seven Issues that good AI Governance needs to address

7

Compliance and Risk Management

- Compliance (with regulations) and being on top of specific emergent legal concerns (copyright issues, contractual indemnification, patentability of innovations among others)
- Data, security and privacy (LLMs have "leaky" data)
- Deepfakes and hallucinations (and human culpability for form over function)

human in the loop

NOTE

#41:

Governance Issue 7 – Risk & Compliance:

Navigating legal issues (copyright, privacy) and security risks (deepfakes).

Seven Issues that good AI Governance needs to address

3

Effective design of (future) work

- Proactively thinking Human+AI architectures

human in the loop

NOTE

#37: Governance Issue 3 – Work Design:

Proactively thinking about how to redesign jobs for a Human+AI workflow.

Seven Issues that good AI Governance needs to address

2

Responsible and Fair Use

- Ensuring representation of company ethics, values and mitigating potential legal concerns
- Safety-first principles of use (see for e.g. recent concerns about fine-tuned LLMs)
- Embracing transparency and accountability

human in the loop

NOTE

#36: Governance Issue 2 – Responsible Use:

Ensuring AI aligns with company ethics, values, and safety principles.

Seven Issues that good AI Governance needs to address

1

Verification architectures for AI use

- Managing hallucinations
- Ensuring correctness both of content as well as how it's used
- Embracing explainability where needed

human in the loop

NOTE

#35:

Governance Issue 1 – Verification:

The need for architectures to manage hallucinations and ensure correctness through testing.

What role does AI play in 'Prior Authorization' in healthcare?

human in the loop

NOTE

It helps accelerate medical approvals by quickly analyzing patient data against insurance criteria.

AI for Work and Life
University of North Florida

Which ethical principle requires that AI systems explain how they reached a specific decision?

human in the loop

NOTE

Transparency

Generative AI for Academic and Scientific Writing Mastery
Udemy

What is the main limitation of an AI assistant compared to a dedicated human expert?

human in the loop

NOTE

The AI lacks consciousness, opinions, and the deep, nuanced understanding that a specialized human researcher possesses.
